for the record - I was actively working the assigned shift and available to confirm my presence. Before removing me from the shift and canceling my future assignment, I was never contacted or given an opportunity to respond. I request a formal review of this incident, correction of my work record if it was based on inaccurate information, confirmation that I will be paid for all hours worked, and an explanation of why I was removed without first verifying my attendance with me or my supervisor.

Mr. Lodge,

As stated previously, we cannot take any action on behalf of the client without their approval. If they would like to put you back on the schedule for Friday, they are in full control and have the ability to do so. Please direct your supervisor to check in with their boss to let them know that you're working so they can clean this up.

I was on site beginning around 4:30 AM and worked throughout the morning. If there is any question about whether I was present, please review the GPS/location records associated with my account for this shift, as well as any requester tracking data. Those records should confirm that I was actively working. I also request that my Friday shift be reinstated if there was no valid basis for its cancellation

Hi William,

Are you actively working and in contact with the on-site supervisor? Our systems show that you were cancelled due to not being accounted for at the job site. Let us know and we will review.

Best,

GigSmart Support
